Special tooling to retain for form

This unit was designed specifically for the assembly of Heat Exchanger Panels. It is ideal for producing unions of mixed diameter tubes. Stainless and Aluminum. Special tooling allows the assemblies as illustrated above. The versatility of this unit is unlimited. Simply provide AMH with a drawing and we can give you a budgetary quote that we are sure will fit in your budget. Some automation is included in this unit that will automatically position the tube length from the clamp as well as automatically position the flare and
